ABOUT ISENTIA

Powered by technology,
inspired by people

Our mission is to help organisations, like yours, leap forward.

We ask questions, seek information and create simplicity in an ever-expanding media landscape.

With more than 30 years' experience working with the biggest brands across Asia-Pacific, we continue to be curious and were listed on the Australian Financial Review's 50 Most Innovative Companies last year.

We'll give you a wealth of relevant information, at speed, with the tools to take action and give you an edge over the competition.

CRISIS REPORTING

5-hour activation for crisis reports. Understand **WHO** is talking and **HOW** are they talking, to craft appropriate responses to counter key narratives.

Regular reports on a daily, weekly, monthly and yearly basis are also available.

Crisis Report Summary (16-18 Sep 2016)

Remote Gambling

Issue focus:

1. Government disfavoured due to perceived double standard on impending exemption of Singapore Pools, STC from Remote Gambling Act
2. Online petition against perceived legalisation of online gambling in Singapore gained low traction
3. Concern seen on perceived negative social consequences of gambling addiction
4. Legalisation of online betting seen as contradictory to Government's efforts on promotion of healthy family unit
5. Authorities urged to set conditions for online betting to avoid exacerbation of problem gambling

Story 1

Government disfavoured due to perceived double standard on impending exemption of Singapore Pools, STC from Remote Gambling Act

What Caused Chatter:

On If Only Singaporeans and HardwareZone Forum, it was shared that Singapore Pools and the Singapore Turf Club (STC) were preparing to launch their online betting services in anticipation of getting an exemption from the Remote Gambling Act by the end of the month.

On SG Talk Forum, "sgbuffet" shared a 28 Nov 2013 report on CalvinAyre.com regarding the legislation that would formally outlaw online gambling in Singapore. Minister (MTI) S Iswaran reportedly indicated that online gambling was a "potentially more addictive form of gambling" than its land-based counterpart. In this regard, the thread starter wondered why the Government would now allow Singapore Pools and STC to launch their online betting services in the country. He also held that if online gambling was harmful, then it should be "banned without exclusion".

Overall Sentiment: Negative towards the impending exemption of Singapore Pools and STC from the Remote Gambling Act

Social Media Activity: High activity was observed on [If Only Singaporeans](#), HardwareZone Forum [\[1\]](#) [\[2\]](#) and [SG Talk Forum](#).

Common Opinions:

- Many netizens expressed criticism towards the perceived "hypocrisy" of the Government and its double standard on who should be allowed to operate remote gambling services in Singapore.
- Some claimed that the launch of online betting services would encourage younger people to gamble.
- A few stated that it would contribute to the rising debt of gambling addicts.
- A few, on the other hand, welcomed the move due to the perception that punters would no longer need to queue in betting outlets.

SOCIAL SEGMENTATION

Understand **WHO** is talking and **HOW** are they talking, with a combination of data science and qualitative analytics, for greater effectiveness in crafting your campaigns.

Summary	(change climate source world global year said people like study)	(one recycle time year work new like first get make)
Who?	Climate change activists	Plastic Utilitarians

OVERALL SENTIMENT ON ISSUE:

OVERALL SENTIMENT ON ISSUES

HOW ARE THEY TALKING?

We are so far behind in harnessing clean energy where in Singapore we have plenty of rain fall and sunshine. Why are we lacking behind is what our present government should be doing. We are one of the richest nation with zero debt but why are we falling behind. [\[Link\]](#)

Denying climate change is like a frog sitting on a frying pan that is slowly heating up. By the time he realises that it's too hot, it's too late...fried! [\[Link\]](#)

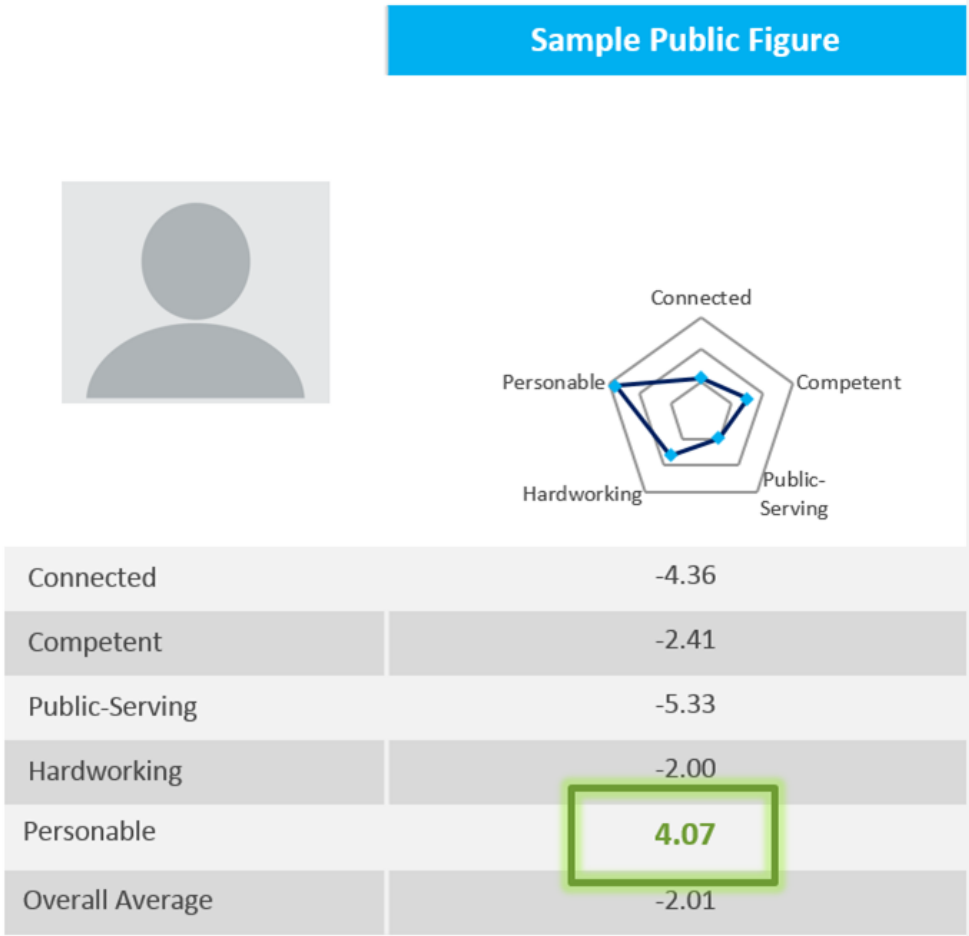

Yes finally! It's been excessive use of plastic bags for too long...It's time we increase our environment consciousness to care for the earth. Use wisely and opt for a recycling bag. Save the earth, save the animals and now save money. :) [\[Link\]](#)

It is actually a matter of self discipline to not always opt for plastic bags. It felt good too that I get to do my small part in preserving the environment. [\[Link\]](#)

PROFILING REPORTS

Identify and analyze **WHAT** is the public perception of a public figure, and the association with his/her key mandate and interest areas.

Conduct a trait analysis based on a set of predefined traits (Competence, Connectedness, Public Serving, Personability), with the ability to benchmark. This can also be done for personalities in other countries.

REDEFINING BRAND HEALTH

Evaluate **HOW** your organization is perceived, **WHAT** triggered conversations, **WHAT** drives sentiments about your organization.

MAINSTREAM INSIGHTS

Favorability

Having a favorable coverage will uplift readers' perception of your brand.

Journalists

Identify journalists who write favorably about your brand.

Deepen engagement with them to sustain high level of favorable coverage.

Messages

Evaluate the efficiency of media publications in conveying your messages.

Improve message resonation with your target audience.

Perception Gap

What is the gap between mainstream coverage and social chatters of your brand? How do you close the gap?

DEEP DIVE into every aspect of your Mainstream Media efforts

Perception Gap Caselet:

Innovation <> Job loss

Smart digital tower for air traffic control to be trialled at Singapore's Changi Airport

Mainstream story captured how the smart tower will **augment** the role of air traffic controllers.

Wow, that's a very big challenge. I'm still a strong believer that no tech can take over human. Machines should only compliment human and do the mundane tasks. I don't think they are planning to remove the air traffic controller. Artificial intelligence should be applicable here to calculate the best route for each incoming and outgoing but still, human overwrites must be given 1st priority.

Dangerous, shouldn't be. 1) is artificial intelligence and anything can happen as it is just a soft ware. 2) decreasing employment opportunity. Human intelligence is more trustworthy than Artificial intelligence. 3) if artificial intelligence supercede human intelligence there will be no more loves intelligence. Meaning government also can be auto pilot to run the country using artificial intelligence without coalition or opposition parties! Start to be dumb or smart?! Whoever proposed such project is definitely have a dummy intelligent mind!

Netizens wrongly assumed that the smart tower will **replace** air traffic controllers.

They talked a great deal about the **irreplaceability of the human element** in jobs.

Reputation Analysis

RepID

STRATEGY

CULTURE

DELIVERY

reputation

noun [C usually singular, U]

the opinion that people in general have about someone or something, or how much respect or admiration someone or something receives, based on past behaviour or character.

REPUTATION ANALYSIS

WHAT IT IS

Our reputation analysis uses an integrated framework that blends social media conversations and survey data in order to reveal a comprehensive view on what people say, think and feel about your organisation.

Our framework looks into the most important drivers of organisational reputation, representing three levels: Strategy, Culture, and finally Delivery. We unpack each to reveal opportunities and weaknesses, along with demographic insights and where neutral audiences may be influenced.

WHY IT'S BETTER

Not only is the mix of social media and survey analysis a game changer, we can also deliver this product back to clients faster and at a better price than others in the market.

WHAT DO WE CALL IT

Isentia's Reputation Analysis. We call the overall score a 'RepID' score, that's weighted on our own -10 to +10 scale, that can easily work in with other metrics clients use today.

WHO WANTS IT

From CEOs and CFOs who understand the value reputation holds, to Heads of Comms and Marketing looking for a quick way to benchmark, protect and influence their organisational reputation. HR leaders are also conscious of reputation's power to attract or deter talent, and COOs are connecting the dots between a failure to deliver, and the impact this has to an organisations reputation.

RepID

REPUTATION ANALYSIS

FIND OUT MORE

Isentia's Reputation Analysis is set to be a game-changer in traditional media intelligence and market research circles. It blends organic social media conversations and survey data to provide a more comprehensive and modern view of what the public says, thinks and feels about an organisation.

Isentia's Reputation Analysis uses an integrated framework that examines the three most important drivers of organisational reputation: strategy, culture, and delivery.

All three drivers are analysed independently, and the report includes an overall RepID score on a scale of -10 to +10 which integrates the strategy, culture and delivery scores, as well as providing detailed information on performance across each driver.

RepID is designed to help organisations across APAC benchmark, strategise and measure reputation.
