EXECUTIVE SUMMARY

- The **[Weekend Australian](#)** (page 7) leads coverage reporting that dementia deaths have reached a record high as Australia's ageing population reshapes national mortality trends, with ABS data showing dementia is now the leading cause of death and accidental falls and medication overdoses rising sharply while heart disease rates hit historic lows. *Also reported by:* [The West Australian \(Saturday edition\) \(Perth\)](#), [Canberra Times \(Online\)](#), [ABC Online \(Online\)](#), [SBS \(Online\)](#), [9News \(Online\)](#), [6PR \(Online\)](#), [Yahoo! News Australia \(Online\)](#)
- The **[West Australian](#)** (page 1) reports a fortnight after Labor expanded bulk-billing, Perth patients are struggling to find GPs signed up to the scheme, with low registration rates prompting concerns from doctors, criticism from the Opposition, as Health Minister Mark Butler said 134 WA clinics have now registered to fully bulk-bill as at November 14.
- The **[Courier Mail](#)** (page 4) reports Queensland ministers have criticised the Federal Government's illicit tobacco and vaping policies, arguing they have fuelled a booming black market, while NSW Health Minister Ryan Park has written to federal Health Minister Mark Butler seeking a review of tobacco excise.
- The **[Courier Mail](#)** (page 23) reports mental health has become one of the leading causes of total and permanent disability insurance claims in Australia, with CALI data showing a significant rise in younger claimants and growing pressure on insurers as premiums increase amid shortages of psychological support services.

- The [Weekend Australian](#) (page 6) reports Queensland will from December 1 allow all specialist GPs to diagnose and treat ADHD in patients over four, with expanded prescribing powers for paediatricians, in a move the state government says will ease access pressures despite ongoing national medication shortages.
- The [Northern Territory News](#) (page 1), [Canberra Times](#) (page 1) and [The West Australian](#) (page 1) report schools have been affected by the national recall of coloured play sand that may contain asbestos, prompting urgent cleaning, isolation of unremediated classrooms and safety warnings from education and regulatory authorities.
- The [Courier Mail](#) (page 8) reports Queensland is paying 91 suspended clinicians on full salaries amid a health workforce crisis, with the doctors' union alleging suspensions lack transparency and deter staff from speaking up, while Queensland Health said decisions follow legislation and are only made when necessary.
- [The West Australian](#) (page 9) reports Australian health experts are watching Canada's loss of its measles elimination status after more than 5100 cases, with local specialists warning strong vaccination rates are essential as Australia continues to record imported cases without sustained transmission.

MINISTER BUTLER

Albo's free GP pledge fail

The West Australian (Saturday edition), General News, 15/11/2025, Caitlyn Rintoul, Page 1

A fortnight after Labor rolled out the scheme, analysis of GP clinics shows those advertised as "fully bulk-billing" are few and far between. [...] Health Minister Mark Butler claimed that WA GPs were joining the Medicare wave, saying that 134 clinics had registered to fully bulk-bill as at November 14.

Breast density reporting is new, so what does it mean for me?

The Australian, Other, 14/11/2025, Dr Magdalena Simonis

Breast density reporting through breast screening is now routine in most states and will become a uniform national practice by the end of next year. But although it sounds straightforward, there's a lot more to understanding how breast density can affect your cancer risk – and how you can reduce that risk. Breast density refers to the amount of fibroglandular tissue in the breast; it has nothing to do with how firm your breasts feel, nor how they look when you take off your bra.

Simple step to reduce whooping cough missed in hospitals, report finds

Medical Forum, Other, 14/11/2025

Australia is in the midst of a record-breaking whooping cough epidemic, yet hospitals are not taking a simple step that could bolster defences against the potentially deadly virus. The Immunisation Foundation of Australia is urging all hospitals to take action to follow government recommendations around vaccinations.

Buruli ulcer: coming to a suburb near you?

Medicine Today, Other, 14/11/2025, Andrew Haysom

Buruli ulcer, caused by *Mycobacterium ulcerans*, is a curable yet often misunderstood skin infection now emerging in Victoria. Evidence increasingly identifies mosquitoes as the key vector, with possums as a major environmental reservoir. Understanding its transmission, recognition and prevention is crucial as the disease continues to expand its range.

Flu deaths outpace COVID-19 deaths

Medicine Today, Other, 14/11/2025

In August 2025 there were more deaths in Australia from influenza (n = 211) than from COVID-19 (n = 153), Australian Bureau of Statistics data show. Between January and August 2025, deaths involving COVID-19 were lower than in 2023 and 2024, while deaths involving influenza and respiratory syncytial virus were higher.

UK hospitals bracing for once-in-a-decade flu surge this winter

The Guardian, Other, 15/11/2025, Ian Sample

Hospitals are bracing for a once-in-a-decade flu season, with a mutated version of the virus that is spreading widely in younger people expected to drive a wave of admissions when it reaches the elderly. [...] Genetic analysis shows it is a descendant of a strain that this year fuelled Australia's worst flu season on record.

ABC News, News Breakfast, 14/11/2025, James Glenday and Catherine Murphy

Concertgoers who watched Oasis perform on Saturday are being told to monitor for symptoms of measles after it was confirmed that there was a case who attended the show.

Influencers warned to align with TGA advice

Royal Australian College of General Practitioners, Other, 14/11/2025, Karen Burge

An increase in the unlawful advertising on social media of prescription-only medicines, such as weight loss drugs and cosmetic injectables, has prompted the Therapeutic Goods Administration (TGA) to strengthen its stance with updated advice. The revised guidance aims to ensure 'businesses and social media account holders, including influencers' are aware of their legal responsibilities.

OFFICE OF DRUG CONTROL

The WA government is asking whether cannabis should be legalised.

Will it listen?

Sydney Morning Herald, Other, 14/11/2025, Hannah Murphy

The West Australian government's Mental Health Commission is surveying people on whether they would like to see cannabis legalised. The commission asked the question as part of its 2025's Drug Attitudes survey, which collects information on West Australians categorise their drug use, their drugs of choice and the availability of help services.

FOOD STANDARDS

Air of rebellion: farmers have had a gutful of net-zero feed for cows

Weekend Australian, International News, 15/11/2025, Jacquelin Magnay, Page 10

What could possibly go wrong when politicians legally mandate for farmers to put a controversial chemical compound, Bovaer, into the feed of cows, all in the name of net zero? [...] In Australia, where the same chemical has been given regulatory approval to add to cattle feed on a voluntary basis, consumers might begin asking some questions.

Methane-reducing feed on Labor's agenda

Warrnambool Standard, General News, 15/11/2025, Jason Gregory, Page 19

Labor has faced questions about the likelihood of forcing Australian cattle producers and dairies to use a methane-reducing feed additive as a way to meet its climate targets. The Danish government introduced mandates earlier this year that required dairy farmers in that country with more than 50 cows to adjust their feeding regimes as a way of encouraging the agricultural industry to reduce its carbon footprint.

Asbestos in coloured sand used at schools

The West Australian (Saturday edition), General News, 15/11/2025, Bethany Hiatt, Page 1

The Education Department sent out an urgent warning to all WA public schools to stop using several coloured sand products "immediately" because of concerns they could be contaminated with asbestos. The Australian Competition and Consumer Commission issued an urgent recall notice this week for three decorative sand products used for children's craft and sensory play.

Quick sand chaos

Canberra Times, General News, 15/11/2025, Nieve Walton, Page 1

The ACT government has defended closing some schools yesterday, a decision which threw the city

into chaos as parents rushed to find alternative arrangements for students. Education Minister Yvette Berry said she was hoping to have schools open by Monday as asbestos experts worked over the weekend to test and remediate schools, if asbestos was detected.

Asbestos sand in schools

Northern Territory News, General News, 15/11/2025, Fia Walsh, Page 1

At least 41 Northern Territory schools have confirmed they are impacted by a national recall on coloured play sand found to contain asbestos, with that number expected to grow. While NT WorkSafe has identified the risk as low, the education department advised staff not to touch any of the opened products and has urgently organised cleaners to decontaminate affected classrooms.
